

### Using Admin App

How to see your Employee table from admin panel?

- If you want to access your table then register model to the admin interface
- In testapp.admin.py

```
from django.contrib import admin  
from testapp.models import Employee
```

```
admin.site.register(Employee)
```

- In model class, add the following function (optional):

```
def __str__(self):  
    return self.ename
```
